Jack Sawyer is an ex-airline pilot turned into a reluctant private investigator. Recommended by his estranged wife Susan, he finds himself looking into the death of an airline copilot: officially, the mans death was an accident but there are suspicions that could hint at something else. With his estranged wife and a growing caste of other friends and acquaintances in tow, Jack sets out to track down the real reasons behind the mystery and possible murder - a humorous, insightful and exciting adventure! Media Reviewers have said: -A chilling climax...Open Skies is his best! -Before we get to an unusual climax, there is action galore! -Tense, smart and especially appealing... Liverpool Daily Post -For the whodunnit fan looking for something different...good reading. -A super story, a chip off the old Block!
